

ULTRA FLOW^{GT1}

UNDERLAY

For engineered wood and laminate flooring
floated over underfloor heating

Specifically designed
underlay for underfloor
heating

Perforated to provide low
tog value and excellent
heat transfer

Closed Cell IXPE foam
gives high performance
underfoot but lightweight
to handle and install

Built-in vapour barrier to
protect against moisture
from sub-floor.

SIZE :
1.1m x 9.1m x 2mm (10m²)

ULTRA DUAL

SL1

UNDERLAY

For engineered wood and laminate flooring

Provides superb sound and moisture protection

Optimal cushioning and design for floated installations

High density foam gives high performance and acoustic properties underfoot

Built-in vapour barrier to protect against moisture from sub-floor

SIZE :

1.1m x 9.1m x 3mm (10m²)
