ULTRADUAL

Enhanced Floor Underlayment

Enhanced Floor Underlayment + Moisture Barrier

ULTRADUAL flooring underlayment is an essential underlayment & moisture barrier with a self-sealing lip & tape system. ULTRADUAL can be used for most floating floors in both residential and commercial applications.

Standard Sound Absorption

Helps quiet sounds from foot traffic. Reduces noise in today's active households & minimizes the hollow sound associated with floating floors.

Fast & Easy Installation

Features printed grid pattern for fast, accurate cuts. Includes moisture resistant tape along the edge for ease of installation.

Double Moisture Protection

Protect your floors from harmful subfloor moisture with built-in moisture barrier attached to both sides of the foam. No additional films required.

Maximize Comfort

Cushioned foam underlayment helps smooth out minor subfloor imperfections & irregularities. Increases thermal and sound insulation.
